### **National Test of the Wireless Emergency Alert (WEA) and Emergency Alert System (EAS)**

On 10/03/18, the Federal Emergency Management Agency (FEMA), in coordination with the Federal Communications Commission (FCC), will conduct a nationwide test of the Emergency Alert System (EAS) and Wireless Emergency Alert (WEA) system.

- The test will assess the readiness to distribute an emergency message nationwide and determine whether improvements are needed.
- At 1118 hours, the WEA test message will be sent to cell phones that are connected to wireless providers participating in WEA.
- At 1120 hours, the EAS message will be sent. EAS is a national public warning system that provides the President with the communications capability to address the nation during a national emergency. The test is made available to EAS participants (i.e., radio and television broadcasters, cable systems, satellite radio and television providers, and wireline video providers) and is scheduled to last approximately one minute.

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

- Cool, moist, unsettled weather through Friday night at least as a couple low pressure systems pass over Northern California.
- Many areas will accumulate more wetting rain.
- The lows depart this weekend, high pressure moves into place off shore for warming/drying/windier trend.
- Strong, gusty N to NE wind developing Saturday afternoon, lasting through Sunday, speeds possibly becoming 20-30 mph with gusts 40-50 mph windiest locations then much lighter Monday.
- Temps 5-8 degrees below normal into the weekend (warmest inland areas mid/upper 70s), then warmer Sunday into early next week (warmest inland areas low/mid 80s).

## **SOUTHERN CALIFORNIA**

- Remnants of former Hurricane Rosa will remain well east of the area, but an unseasonably deep trough will spread scattered showers and isolated thunderstorms over the area into today.
- Below average temperatures will persist through the end of the week.
- Isolated showers and thunderstorms will be possible today.
- Scattered showers and isolated thunderstorms will occur along the central coast by noon today. Storm total precipitation will be 0.10" – 0.25" over most areas before the precipitation ends this evening. Some south aspects of Southern California may see around 0.50 – 1.00" with highly variable amounts due to convection.
- Temperatures 8-10 degrees below normal through Saturday with highs in the 50s and lower 60s in the mountains to the upper 70s to lower 80s in the valleys.
- Gusty northwest winds possible along the central coast late this week through the weekend, but no offshore flow is expected.
- Expect uncommonly high relative humidity (RH) through Thursday, then turning seasonally dry this weekend with marine layer coverage increasing.
